

Disclaimer:

Records displayed on the Yukon Lands Viewer do not reflect a comprehensive or definitive list of locations of species and ecological communities at risk in Yukon. The data are not a final statement on the current presence or absence of species of conservation concern within a given area. The Yukon Conservation Data Centre collects data from many sources. Data are not all the result of comprehensive site-specific field surveys. Many areas in Yukon have never been thoroughly surveyed for species of conservation concern. Use of these records is no substitute for the on-site surveys usually required for environmental assessment. The CDC's database is dynamic and records are added or amended on a regular basis. Please contact the Yukon CDC for more information.
