

Yukon Trapping

! Not a legal document

This brochure is not a legal document and does not contain all the details of the current *Trapping Regulations*. It is a short guide designed to help you understand the basic rules. For more details, consult the *Wildlife Act* and regulations or talk to a Conservation Officer.

On the cover:

Shanti Morrison-Doherty, member of an all-female group trapping concession, standing by a pair of Tlingit snowshoes hung with tanned marten furs.

Photo by Minnie Clark.

Send us your photos! Want to be on next year's cover? Send your trapping pictures to coservices@gov.yk.ca.

Highlights for 2017-18

New Trap Use Requirements Coming in 2020

Starting **October 1, 2020**, Yukon trappers will be required to only use certified restraining traps for beaver and wolf. See page 8 for more information on permitted trapping devices and international humane trapping standards.

Wanted: Wolverine and Lynx Carcasses

Wolverine

As part of an ongoing study on the territory's wolverine population, you are invited to submit your frozen, skinned wolverine carcasses to your nearest Environment office. You will receive \$50 for each complete wolverine carcass (including the skull) to recognize your contribution to this research.

You must include the following information with the carcass:

- ▶ trapper name
- ▶ trapping licence number
- ▶ trapping concession number
- ▶ harvest date
- ▶ sex of animal

For more information about the wolverine study, call 1-800-661-0408, ext. 5766.

Lynx

As part of a study on the population and movement of lynx, the Department of Environment will ask trappers in select areas (Watson Lake, Mayo, Faro, Kluane Lake area and Whitehorse) to submit a limited number of lynx carcasses in the 2017-18 trapping season. If you are not contacted by the department requesting lynx carcasses, please do not submit any. Environment offices will not accept them.

For more information about the lynx study, call 1-800-661-0408, ext. 5464.

Trapping Concession Area Maps Now Available

Colour, 11" x 17" paper maps of your trapping concession area are now available from the Department of Environment. Contact the Program Advisor, Fur and Outfitting Industries at 1-800-661-0408, ext. 8403 or your local Conservation Officer to request copies. Remember to ask for maps when picking up your trapping concession certificate.

Trapping Concessions

A concession gives you the exclusive opportunity to commercially trap in that area. You can hold only one trapping concession at a time. Trapping concessions may be granted to a partnership or a group if all members are eligible.

Requirements

To be eligible for a trapping concession you must:

- ▶ be at least 16 years old
- ▶ be a Canadian citizen or permanent resident of Canada
 - ▶ whose principal residence has been in Yukon for at least 12 months immediately before applying for a licence
 - ▶ who has been physically present in Yukon for at least 185 days during that period, or who qualifies under a residency exemption form
- ▶ have no convictions for significant wildlife offences
- ▶ have graduated from a recognized trapper education workshop (trappers 65 years of age or over who have previously held a Yukon trapping licence or assistant trapper licence are exempt from this requirement)
- ▶ be eligible for a Yukon hunting licence, including hunter education training if you were born after April 1, 1987
- ▶ for a full term concession, demonstrate to a Conservation Officer that you are able to run a trapping concession as required by the *Wildlife Act* and regulations for a minimum one-year probationary period

Probationary Concession

A one-year probationary concession may be granted to a person, partnership or group that has not held a concession before. Unless it is cancelled, a probationary concession **expires on March 31** following the date of issue.

A probationary concession may be renewed twice if a longer probationary period is warranted, or upgraded to a full term concession, at the discretion of the Minister of Environment or the recommendation of a First Nation. **You must apply for renewal of a probationary concession at least 30 days before its expiry date.**

Full Term Concession

A full term concession gives you the exclusive opportunity to commercially trap in a specific area for five years. A full term concession **expires on March 31**, five years after it

Trapping Concessions

was granted. You will receive 90 days' notice of your concession's expiry by registered or certified mail. The notice will be sent to the address given on your last application unless you provide an alternate address to the Department of Environment in writing.

You must apply for renewal of a full term concession within the 90-day period after receiving the notice.

When an application to renew is received, the concession may be renewed for five years. Full term concessions can be renewed for less than five years if:

- ▶ the applicant has violated the *Wildlife Act*
- ▶ the Minister of Environment believes it is necessary for wildlife conservation or public interest

Before renewing the concession for a period less than five years, the Minister of Environment must refer the application to the Concession and Compensation Review Board. The board makes recommendations to the Minister on issuing, reviewing, cancelling or suspending trapping concessions.

Concession Fees

Probationary concession, or renewal	\$10
Full term concession, or renewal	\$20
Group area concession	\$100

Concession Cancellations and Non-Renewals

A concession may be cancelled or not renewed if:

- ▶ the applicant is convicted of using poison, interfering with traps, wasting pelts and/or other violations of the *Trapping Regulations* and the *Wildlife Act*
- ▶ the applicant does not meet the trapping concession requirements
- ▶ it is necessary for the conservation of wildlife anywhere in the trapping area
- ▶ it is necessary to protect the public interest
- ▶ it is recommended by the local Renewable Resources Council or Conservation Officer due to lack of use

See page 22 for more information on the role of Renewable Resources Councils.

Trapping Licences and Assistant Trapper Licences

Along with a valid concession, you must have a valid annual trapping licence or assistant trapper licence to trap in Yukon. Current licences are **valid from July 1, 2017 to June 30, 2018**.

Trapping Licence Requirements

You must hold a trapping concession and meet the same requirements as concession holders. See page 3.

Assistant Trapper Licence Requirements

An assistant trapper licence may be issued to a qualified person at the request of the trapping concession holder(s). The concession holder(s) can also cancel this licence.

To be eligible for an assistant trapper licence you must:

- ▶ be at least 16 years old
- ▶ be a Canadian citizen or permanent resident of Canada
 - ▶ whose principal residence has been in Yukon for at least 12 months immediately before applying for a licence
 - ▶ who has been physically present in Yukon for at least 185 days during that period
- ▶ have written consent from the holder(s) of the trapping concession on which you plan to trap
- ▶ have graduated from a recognized trapper training workshop (assistant trappers 65 years of age or over who have previously held a Yukon trapping licence or assistant trapper licence are exempt from this requirement)

See page 7 for more information about training.

Licence Fees

Trapping licence	\$10
Assistant trapper licence	\$10
Senior citizens (65+)	FREE
Members of a group trapping area	FREE
Replacement copy	\$2

Trapping Licences and Assistant Trapper Licences

Residency Exemption

Yukon residents who maintain a home in Yukon, and who file their taxes in Yukon but who must leave the territory for work, to attend school or for medical reasons, can apply for a trapping licence or assistant trapper licence by completing a residency exemption form, available at Environment offices.

! Trappers living outside Yukon

A Canadian citizen or permanent resident living outside Yukon, but within 150 km of the trapping concession they apply for, may be considered a Yukon resident under the *Trapping Regulations*.

cancelling an Assistant Trapper Licence

A trapping concession holder can cancel an assistant trapper licence by completing a form available at Environment offices and submitting it to a Conservation Officer.

The cancellation will take effect 10 days after the Conservation Officer notifies the assistant trapper.

Becoming an Assistant Trapper

Assistant trappers are an important part of the trapping community. Over the years, many new trappers have gained valuable experience by working with an experienced trapper. Assistants can also benefit senior trappers by helping with the more strenuous activities required out on the trapline.

The Yukon Fish and Wildlife Management Board, local Renewable Resources Councils, the Yukon Trappers Association and Conservation Officers are all trying to help new trappers find concession holders who are interested in having an assistant trapper work with them.

The work of an assistant can enhance, but cannot replace, the trapping efforts of the concession holder. Keep this in mind when a Conservation Officer or Renewable Resources Council assesses trapping activity prior to concession renewal.

Contact your local Renewable Resources Council, local Conservation Officer, or the Yukon Trappers Association if you are looking for an assistant or want to become an assistant trapper.

Trapping for Food

If you are a citizen or member of a Yukon First Nation with a Final Agreement, you have the right to subsistence trap furbearing animals in the Traditional Territory of your First Nation, including any portion of your Traditional Territory that overlaps another First Nation's Traditional Territory. Subsistence trapping means you are harvesting animals for food.

Trapping as a Commercial Activity

If you intend to sell furbearing animal pelts or other non-edible by-products or goods manufactured from them, then you are taking part in a commercial activity. Commercial activities are subject to the Laws of General Application as referred to in sections 16.4.5 and 16.4.11 of all First Nation Final Agreements and are subject to the regulations in the *Wildlife Act*. You will need to obtain a trapping licence or assistant trapper licence and follow the *Wildlife Act* and *Trapping Regulations*.

Trapper Training

Trapper training is an important requirement for trappers. Members of group traplines must also undergo training to obtain their group membership.

Each year, the Department of Environment offers the Basic Trapper Training Workshop in several Yukon communities between September and March. Workshops rotate through rural Yukon communities on a three-year cycle. Contact the department as early as possible to be included on the attendance list. The workshop schedule will be sent to those on the attendance list in early fall. Submit registration fees promptly; workshops may fill up quickly, or be cancelled if not enough fees are received. See www.env.gov.yk.ca/trapper-ed for upcoming workshops in your area.

Trappers 65 years of age or over who have previously held a Yukon trapping licence or assistant trapper licence are exempt from this requirement. Any trapper who has not had a licence within the past 10 years is strongly advised to attend a workshop as there have been numerous changes in equipment, techniques and regulations.

Graduation from recognized trapper training in another province or territory may also meet the licence requirements. For more information, contact the Department of Environment at 1-800-661-0408, ext. 8403 or 6273.

Trapper Training

The Yukon Trappers Association offers a variety of trapper development and specialty workshops. You can contact the association by phone at 867-667-7091, by email at yukonfur@yknnet.ca, or on Facebook.

Permitted Trapping Devices

Innovations and improvements adopted by Canadian trappers have made trapping more humane. Yukon trappers must use traps certified to meet the criteria set out in the *Agreement on International Humane Trapping Standards*, which identify devices used in the capture of several furbearing animals, including nine Yukon species.

Nationally, the Fur Institute of Canada administers the trap testing program that evaluates traps against international humane trapping standards. Trap models that meet this standard are then certified and the manufacturer stamps the certification number on each trap, e.g., QMC, MWA, etc. **It is legal to use identical traps (same make and model) manufactured before certification, provided the traps have not been modified.**

Trap research continues for species such as coyote. Three years' notice of new regulatory requirements is given to allow trappers time to switch to certified traps. Traps for all species continue to be tested and certified to give trappers greater variety.

Quick kill traps

A quick kill trap is a mechanically-powered, trigger-activated trap that is not a restraining or leg-hold trap. It is used for the sole purpose of capturing and killing a furbearing animal. **Dead fall traps do not meet the legal definition of quick kill.**

Certified quick kill traps must be used in Yukon for beaver, fisher, marten, lynx, otter, weasel, ermine and muskrat.

Restraining traps

A restraining trap is a leg-hold, box or cage trap designed to hold an animal but not kill it.

Certified restraining traps must be used in Yukon for lynx.

Furbearing animal

Furbearing animals in Yukon include: beaver, coyote, fisher, red fox, arctic fox, lynx, marten, mink, muskrat, otter, red squirrel, weasel, wolf or wolverine.

! New requirement to use certified restraining traps for beaver and wolf in 2020

A number of different devices have been certified for beaver and wolf. Starting October 1, 2020, trappers will be legally required to use only certified restraining traps for these species.

A list of certified traps is available at the Fur Institute of Canada website at www.fur.ca or through Environment offices.

Many Yukon trappers use killing traps for these species. If you use restraining traps for wolf, you may not need to change your equipment, as many recently certified traps are already in common use.

Snares

Neck snares equipped with a locking device may be used to capture any type of furbearing animal. Snares should be constructed to conform to the designs taught in recognized trapper education workshops or as set out in Chapter 6 of the *Yukon Trapper's Manual* or in *Best Trapping Practices (2017)* by the Fédération des Trappeurs Gestionnaires du Québec, available from Environment offices or online at www.env.gov.yk.ca/hunting-fishing-trapping/certifiedtraps.

Power-assisted neck snares are equipped with a powerful spring that acts like a lock, preventing the snare from loosening. Power-assisted foot snares have a locking device that also prevents the snare from loosening.

Non-locking snares may be used for red squirrels only.

Modified restraining (leg-hold) traps in land sets

A modified restraining (leg-hold) trap is one with:

- ▶ padded jaws
- ▶ offset jaws that do not touch over their full length when closed
- ▶ laminated jaws with a gripping surface at least 9 mm wide

Permitted Trapping Devices

Disallowed devices

These devices may not be used to harvest furbearing animals:

- ▶ traps with teeth or metal serrated edges
- ▶ hooks
- ▶ spring poles equipped with leg-hold traps
- ▶ dead fall traps

Certified Trap Use Requirements by Species

It is unlawful to trap furbearing animals with any devices other than those described on pages 10-13 unless the device is on the Fur Institute of Canada's list of certified traps, available at www.fur.ca. The lists on the following pages reflect the July 1, 2017 update.

See pages 11 and 15 for more information on trap check periods for killing and restraining traps.

Beaver

On land and underwater:

- ▶ Certified quick kill traps
 - ▶ Bélisle Classique 330, Bélisle Super X 280, Bélisle Super X 330
 - ▶ B.M.I. 280 Body Gripper, B.M.I. 330 Body Gripper, B.M.I. BT 300
 - ▶ Bridger 330
 - ▶ Duke 330
 - ▶ LDL C280, LDL C280 Magnum, LDL C330, LDL C330 Magnum
 - ▶ Rudy 280, Rudy 330
 - ▶ Sauvageau 1000-11F, Sauvageau 2001-8, Sauvageau 2001-11, Sauvageau 2001-12
 - ▶ Species-Specific 330 Dislocator Half Magnum, Species-Specific 440 Dislocator Half Magnum
 - ▶ Woodstream Oneida Victor Conibear 280, Woodstream Oneida Victor Conibear 330

Underwater:

- ▶ Neck snares equipped with a locking device, including power-assisted neck snares
- ▶ Any trap (quick kill or restraining device) may be used in a submersion (drowning) set that is designed to capture and keep the beaver underwater

Permitted Trapping Devices

Ermine/weasel

- ▶ Certified quick kill traps
 - ▶ Bélisle Super X 110, Bélisle Super X 120
 - ▶ B.M.I #60, B.M.I 120 Body Gripper Magnum, B.M.I 126 Body Gripper Magnum
 - ▶ Bridger 120, Bridger 120 Magnum Bodygripper, Bridger 155 Magnum Bodygripper
 - ▶ Koro Muskrat Trap, Koro Large Rodent Double Spring
 - ▶ LDL B120 Magnum
 - ▶ Ouell 411-180, Ouell 3-10, Ouell RM
 - ▶ Rudy 120 Magnum
 - ▶ Sauvageau C120 Magnum, Sauvageau C120 "Reverse Bend", Sauvageau 2001-5
 - ▶ Triple M
 - ▶ Victor Rat Trap
 - ▶ WCS Tube Trap Int'l
 - ▶ Woodstream Oneida Victor Conibear 110, Woodstream Oneida Victor Conibear 120
- ▶ Neck snares equipped with a locking device, including power-assisted neck snares

Fisher

- ▶ Certified quick kill traps
 - ▶ Bélisle Super X 120, Bélisle Super X 160, Bélisle Super X 220
 - ▶ Koro no 2
 - ▶ LDL C160 Magnum, LDL C220 Magnum
 - ▶ Rudy 120 Magnum, Rudy 160 Plus, Rudy 220 Plus
 - ▶ Sauvageau 2001-5, Sauvageau 2001-6, Sauvageau 2001-7 and Sauvageau 2001-8
- ▶ Neck snares equipped with a locking device, including power-assisted neck snares

! Seven-day trap check for killing traps

Trappers who wish to take advantage of the seven-day trap check period for killing traps should maintain separate lines for killing and restraining sets. The trap check period for restraining sets remains at five days.

Permitted Trapping Devices

Lynx

- ▶ Certified restraining traps, including certified power-assisted foot snares
 - ▶ Bélisle Footsnare #6, Bélisle Sélectif
 - ▶ Oneida Victor #3 Soft Catch with 2 coil springs, Oneida Victor #3 Soft Catch with 4 coil springs
 - ▶ Oneida Victor #3 with at least 8 mm thick, non-offset steel jaws, 4 coil springs and an anchoring swivel centre mounted on a base plate
- ▶ Certified quick kill traps
 - ▶ Bélisle Super X 280, Bélisle Super X 330
 - ▶ B.M.I. 220 Body Gripper, B.M.I 280 Body Gripper, B.M.I. 220 Magnum Body Gripper, B.M.I 280 Magnum Body Gripper
 - ▶ Bridger 220, Bridger 280 Magnum Bodygripper
 - ▶ LDL C220, LDL C220 Magnum, LDL C280 Magnum, LDL C330, LDL C330 Magnum
 - ▶ Rudy 330
 - ▶ Sauvageau 2001-8, Sauvageau 2001-11
 - ▶ Woodstream Oneida Victor Conibear 330
- ▶ Neck snares equipped with a locking device, including power-assisted neck snares

Marten

- ▶ Certified quick kill traps
 - ▶ Bélisle Super X 120, Bélisle Super X 160
 - ▶ BMI 126 Magnum Body Gripper
 - ▶ Eiabzugseisen
 - ▶ Kleiner Schwanenhals
 - ▶ Koro no 1, Koro no 2
 - ▶ KP120
 - ▶ LDL B120 Magnum, LDL C160 Magnum
 - ▶ Northwoods 155
 - ▶ Rudy 120 Magnum, Rudy 160 Plus
 - ▶ Sauvageau C120 Magnum, Sauvageau 2001-5, Sauvageau 2001-6
- ▶ Neck snares equipped with a locking device, including power assisted neck snares

See marten quota information on page 18.

Permitted Trapping Devices

Muskrat

On land and underwater:

- ▶ Certified quick kill traps
 - ▶ Bélisle Super X 110, Bélisle Super X 120
 - ▶ B.M.I. 120 Body Gripper, B.M.I. 120 Body Gripper Magnum, B.M.I. 126 Body Gripper Magnum
 - ▶ Bridger 120, Bridger 120 Magnum Bodygripper, Bridger 155 Magnum Bodygripper
 - ▶ Duke 120
 - ▶ Koro Muskrat Trap, Koro Large Rodent Double Spring
 - ▶ LDL B120 and LDL B120 Magnum
 - ▶ Oneida Victor 120 Stainless Steel
 - ▶ Ouell 411-180, Ouell RM
 - ▶ Rudy 110, Rudy 120, Rudy 120 Magnum
 - ▶ Sauvageau C120 Magnum, Sauvageau C120 "Reverse Bend", Sauvageau 2001-5
 - ▶ Triple M
 - ▶ Woodstream Oneida Victor Conibear 110, Woodstream Oneida Victor Conibear 120

Underwater:

- ▶ Any jaw-type trap (body gripping or leg-hold) set as a submersion set that exerts clamping force on a muskrat and that keeps the muskrat underwater
- ▶ Neck snares equipped with a locking device, including power-assisted neck snares

Otter

- ▶ Certified quick kill traps
 - ▶ Bélisle Super X 220, Bélisle Super X 280, Bélisle Super X 330
 - ▶ LDL C220, LDL C220 Magnum, LDL C280 Magnum
 - ▶ Sauvageau 2001-8, Sauvageau 2001-11, Sauvageau 2001-12
 - ▶ Rudy 220 Plus, Rudy 280, Rudy 330
 - ▶ Woodstream Oneida Victor Conibear 220, Woodstream Oneida Victor Conibear 280, Woodstream Oneida Victor Conibear 330
- ▶ Neck snares equipped with a locking device, including power-assisted neck snares
- ▶ Any trap (quick kill or restraining device) may be used in a submersion (drowning) set that is designed to capture and keep the otter underwater

Permitted Trapping Devices

Trapping Devices for Other Furbearing Animals

The Department of Environment encourages the use of the following devices for species that do not have mandatory trap requirements.

	Coyote	Arctic Fox	Red Fox	Mink	Red Squirrel	Wolf	Wolverine
Quick kill traps	x	x	x	x	x	x	x
Modified restraining traps with a jaw spread of 25 cm or less.	x	x	x			x	
Neck snares equipped with a locking device.	x	x	x	x	x	x	x
Neck snare without a locking device					x		
Power-assisted neck snares	x	x	x	x	x	x	x
Power-assisted foot snares	x	x	x			x	
Any trap used in a submersion (drowning) set.				x			

See page 8 for definitions of trapping devices.

Buyer beware

Trappers buying new or used traps for beaver, fisher, marten, muskrat, lynx, wolf, coyote, ermine and otter should consult the Fur Institute of Canada's list of certified traps at www.fur.ca first to ensure the traps can be used legally.

Trapping Season Dates

Species	Open Season
Beaver	October 1 – May 31
Coyote	November 1 – March 10
Fisher	November 1 – February 28
Fox – red, cross, silver	November 1 – March 10
Fox – arctic	November 1 – March 31
Lynx	November 1 – March 10
Marten – see quotas on page 18	November 1 – February 28
Mink	November 1 – March 31
Muskrat – N. of Arctic Circle	October 1 – June 30
Muskrat – S. of Arctic Circle	October 1 – May 31
Otter	November 1 – March 31
Red Squirrel	November 1 – March 31
Weasel	November 1 – March 31
Wolf	November 1 – March 10
Wolf – neck snare only	March 11 – March 31
Wolverine	November 1 – March 10

Setting, Checking and Removing Traps

It is unlawful to:

- ▶ set or reset a trap for commercial purposes unless you are authorized to do so under the *Wildlife Act*
- ▶ trap within one kilometre of a residence without permission, whether or not the occupants are present at the time (see also “Trapping Near Communities” on page 20)

Every person who installs a snare or trap must:

- ▶ check the set at least once every **five days** if it is designed to **restrain** the animal
- ▶ check the set at least once every **seven days** if it is designed as a **quick killing** set
- ▶ remove any captured animal
- ▶ remove or spring the set by the last day of the season for the targeted species

A restraining trap in a drowning set for muskrat, beaver, mink or otter is classified as a killing set. Captured animals must be removed from sets.

General Regulations

If you discover traps not set by you on your trapping concession, report this to a Conservation Officer as soon as possible.

Pelt Sealing

All **lynx, wolf and wolverine** pelts must have a metal seal secured to the pelt by a Conservation Officer or designate within 15 days of the close of the trapping season for that species, or prior to the sale or transfer of the pelt, whichever comes first.

If you plan to remain on the trapline for the extended wolf snaring season (March 11 – 31) and believe that you will miss the deadline for lynx and wolverine sealing, you will require prior written approval from a Conservation Officer to seek an extension to April 15.

When you submit your lynx, wolf or wolverine pelts for sealing, you must provide the following information for each pelt:

- ▶ trapper name
- ▶ trapping licence number
- ▶ concession number
- ▶ harvest date
- ▶ method of harvest
- ▶ sex of animal

This data will inform wildlife managers about animal populations and biological trends.

To assist you, blank tags for securing these details to each pelt are available at your local Environment office or by contacting the Program Advisor, Fur and Outfitting Industries at 1-800-661-0408, ext. 8403. Keep these tags handy in your skinning shed or cabin to fill out at the time of skinning.

Trappers who voluntarily submit carcasses to the Department of Environment for analysis must also provide this information.

Live-Trapping

It is unlawful to attempt to trap and sell a live furbearing animal, or be in possession of a live furbearing animal, unless you have a live-trapping permit from the Department of Environment. You must obtain this permit before you engage in live-trapping. If you find a live furbearing animal in one of your traps, you cannot keep it alive unless you already have the proper permit. A live-trapping permit describes the conditions and guidelines that you must follow when live-trapping.

General Regulations

For more information, contact your local Conservation Officer.

Emergency Closures

The Minister of Environment has emergency powers to prohibit trapping anywhere it is urgently required for public health, public safety or conservation.

Capturing the wrong species and accidental captures

Trappers who accidentally capture an animal in a trap not permitted for that species (e.g., a marten or wolverine in a leg-hold trap) must report this to a Conservation Officer and submit the dried pelt(s) and carcass(es) of the animal(s) to the Conservation Officer as soon as possible. You may request a permit to possess and sell the pelt(s) at that time.

Conservation

It is unlawful to:

- ▶ Allow any part of a pelt to be wasted. A pelt is wasted if it is abandoned or allowed to be spoiled or destroyed.
- ▶ Allow any meat of a game bird, small or big game animal, other than a wolf, wolverine, bear, or coyote, to be wasted. Meat wastage includes using any of these animals for bait.
- ▶ Damage or interfere with any beaver dam, or the den, lair or nest of any wildlife, unless authorized by a wildlife technician or Conservation Officer. A licensed trapper may open a muskrat push-up to set traps if they are careful to prevent the push-up from freezing.
- ▶ Harass or provoke any wildlife.
- ▶ Use a shotgun to hunt a furbearing animal.

False Statements

It is unlawful to make a false statement on any report or application under the *Wildlife Act*, or to a Conservation Officer acting under the *Wildlife Act*.

Marten Quotas

In an effort to build a sustainable population of marten, quotas are in place on most traplines in the Marten Conservation Area. The area extends from the BC border north to Carmacks and Aishihik Lake, and from the Teslin River west to Kluane National Park.

Quotas are a condition of the concession registration. This places the responsibility on the concession holder to carefully monitor harvest on the concession by all licensed trappers, including assistant trappers. Once the quota for marten has been reached for a concession, all trapping for marten must stop for that season.

Trappers who accidentally capture more than their quota of marten must report this to a Conservation Officer and must submit dried pelts and carcasses of excess animals to the Conservation Officer as soon as practical.

A permit to possess and sell the pelts may be requested at that time.

Hunting While Trapping

Hunting or Snaring Small Game

A Yukon big game or small game hunting licence is required to hunt snowshoe hare, arctic ground squirrel, porcupine, grouse and ptarmigan. You may use a neck snare to catch hares, ground squirrels and porcupines. Remember that you may not hunt or set snares within one kilometre of a residence without permission, whether the occupants are present or not.

Please check the current *Yukon Hunting Regulations Summary* for season dates and bag limits. Although some small game species have no bag limits, these animals should be treated with respect rather than regarded as vermin, as they are a valuable food source for many. It is illegal to waste the meat of small game animals.

Killing furbearing animals

A rimfire rifle may be used to kill furbearing animals trapped and held in a trap or snare that you legally set.

Hunting While Trapping

Moose and Caribou

Trapping concession holders who have a Yukon big game hunting licence have two privileges:

- ▶ Where a trapping concession overlaps subzones open to bull moose hunting, you may continue to hunt moose in that part of the concession that overlaps the subzone area from **November 1 to January 31**. You may not hunt in subzones closed to moose hunting or subject to a permit hunt.
- ▶ You may continue to hunt bull caribou in any open subzone from **November 1 to January 31**. You may not hunt in subzones closed to caribou hunting or subject to a permit hunt.

Beyond these privileges, all season dates, bag limits and sex restrictions apply to hunting moose and caribou while trapping.

Permitted Use of Firearms

Harvesting Under Your Trapping Licence

When harvesting with a trapping licence, you are subject to the *Trapping Regulations*. These include season dates, bag limits, reporting and sealing requirements.

You may only harvest on the concession for which your trapping licence was issued.

For furbearing animals other than wolf, wolverine or coyote, use a rimfire rifle or a centrefire rifle with a bore diameter of less than six millimeters. For wolf, wolverine or coyote, use a centrefire rifle.

You may use rimfire rifles to kill a furbearing animal held in a trap or snare that you legally set.

Harvesting Under Your Hunting Licence

When harvesting with a hunting licence, you are subject to the *Wildlife Regulation* including season dates, bag limits, closed areas, reporting and sealing requirements.

For wolf and coyote, it is legal to use a centrefire firearm 6 mm caliber or smaller. For wolverine, you can only use a centrefire firearm larger than 6 mm caliber.

Your hunting licence does not permit you to use a firearm to dispatch a furbearing animal held in a trap or snare, nor harvest other furbearing animals.

Trapping Near Communities

The Department of Environment encourages you to post signs when you are actively trapping along or near multi-use trails. These blue and yellow “active trapping area” signs posted at trailheads will let users know they are entering an actively trapped area. You may want to consider other notices if you know locals walk their dogs in your trapping area. Pick up these signs from any Environment office.

Trapping on Settlement Lands

Eleven First Nations hold legal title over 31,595 km² of Settlement Land in Yukon in parcels of varying size. In addition to complying with the *Wildlife Act* and its regulations, you will need to comply with any laws of the First Nation whose Settlement Land you are trapping on, and you may need to follow bylaws set by the Renewable Resources Council for that Traditional Territory.

It is strongly recommended that you find out if your trapping concession includes Settlement Land. You can view detailed maps at an Environment office, a First Nation office or online at www.env.gov.yk.ca/maps.

Trapline Use and Allocation

If more than half of your trapline lies inside the Traditional Territory (not including overlap areas) of a First Nation with a Final Agreement, your trapline is identified as either:

- ▶ **Category 1:** The First Nation has final authority in deciding who will get the concession when it becomes available
- ▶ **Category 2:** The Government of Yukon has final authority in deciding who will get the concession when it becomes available

If you want your trapline to be Category 1, you must provide written consent. Without your written consent, your trapline is Category 2. Be aware that once your trapline is designated Category 1, you cannot change it back to Category 2.

Trapping on Settlement Lands

You can transfer your trapping concession to eligible holders in accordance with the *Wildlife Act* and, in the case of Category 1 traplines, also in accordance with the First Nation's allocation policies.

Renewable Resources Councils (RRCs) make recommendations to First Nations and the Government of Yukon on the assignment of vacant and underutilized traplines. Each RRC has established guidelines to evaluate trapline applicants and trapline utilization. Contact your local RRC to obtain a copy of its guidelines. For more detailed information on Renewable Resources Councils, see page 22.

Carrying firearms

It is unlawful to carry a loaded firearm in or on a vehicle, which includes a snowmobile. A boat is not considered a vehicle.

Building Cabins or Cutting Trails

First Nation Final Agreements allow for trappers to continue to have reasonable access and use of their trapping concessions on Settlement Lands, subject to conditions established by the First Nation and Yukon land use regulations.

Before you build a new cabin or cut a new trail on Settlement Lands, you must contact the First Nation office. The First Nation may set conditions on your project to protect the environment, fish and wildlife, and First Nation use of the land. See page 23 for more information about building a cabin on public lands.

Get the Latest Information

If you have questions about any land claim requirements related to trapping, you can get up-to-date information by contacting your local First Nation or an Environment office.

Fuel tax rebate

Trappers are eligible to apply for a fuel tax rebate from the Government of Yukon for fuel used in their off-road equipment for trapping operations.

For more information, contact the Tax Compliance Officer at 1-800-661-0408, ext. 5345 or visit www.finance.gov.yk.ca/ft_exemptions.html. Applications are available at your local Territorial Agent or Environment office.

Renewable Resources Councils

Renewable Resources Councils (RRCs) are established in the Traditional Territory of each First Nation with a Final Agreement. Council members are nominated by the First Nation and Yukon governments.

Renewal Resources Councils are the voice of the community on fish and wildlife issues. They make recommendations on the management of fish and wildlife to the Minister of Environment, First Nations, and the Yukon Fish and Wildlife Management Board.

The councils have a mandate (except in areas where Traditional Territories overlap) to:

- ▶ develop guidelines for trapline use assessment
- ▶ review the utilization of traplines and make recommendations to the Minister of Environment and First Nation on the assignment of vacant or underutilized trapping concessions
- ▶ develop bylaws for the local management of furbearing animals
- ▶ make recommendations to the Minister of Environment and First Nation on the management of furbearing animals

To learn what registered trapping concessions are unassigned, and the timetable for review of trapline applications, contact your Renewable Resources Council.

Trapline cabins on public lands

If you wish to build cabins on public lands in your concession, you will require a lease.

Your application, including a copy of your trapping concession certificate, must be submitted and approved prior to construction.

The lease is only available to the concession holder. If the concession changes hands, the lease must be assigned to the new concession holder. Applications and information on the *Trapping Cabin Policy* can be picked up at Energy, Mines and Resources district offices, at the Lands Management Branch in Room 320 at the Elijah Smith Building (300 Main Street, Whitehorse), or at www.emr.gov.yk.ca.

All cabins built or acquired by the concession holder since 1980 are required by the *Trapping Cabin Policy* to be registered and leased under the *Territorial Lands Regulations*.

Trapping cabins are only for the trapping concession holder to use while trapping, including guided trapping excursions. Other commercial purposes, such as rentals, wilderness tourism and outfitting, are not permitted. See page 26 for more information about guided trapping.

If you are planning to build a cabin on Settlement Lands, different rules apply. See page 21.

Buying or Selling Raw Pelts or Other Furbearing Animal Parts

Licensed trappers do not need a fur trading licence to sell or trade the pelt of a furbearing animal or black bear that they have legally harvested. When making a private sale, trappers should provide their name, licence number, concession number and harvest season. The buyer will need this information to obtain export and Convention on International Trade in Endangered Species (CITES) permits.

A special permit from the Department of Environment is required to sell other parts of trapped furbearing animals or other wildlife (e.g., skulls, claws, etc.). Contact your local Conservation Officer for more information.

Residents holding a big game hunting licence may, during the term of that licence, sell the pelt of a wolf or coyote they have harvested. The sale of a wolverine pelt, however, requires a permit, available from Environment offices. There is no limit on the value of furbearing animal pelts residents may buy for personal use.

Non-residents, for their personal use, may buy the pelts of furbearing animals and black bears from a licensed Yukon trapper or assistant trapper. The total value of pelts purchased may not exceed \$2000 per licensing year.

If you do not fall into one of these categories and wish to sell raw pelts obtained from another person, you are considered a fur trader.

Fur traders require an annual licence from the Department of Environment and must submit their Record of Wildlife Purchased or Received forms (WPRs) to a Conservation Officer within 10 days after the end of each month.

Fur traders may have an individual trading on their behalf under the authority of an agent licence.

Fur Trading Licence Fees

Yukon resident	\$25
Non-resident	\$300
Non-resident restricted*	\$25
Agent	\$5

** This licence is valid for seven days and only one licence of this type will be issued to an individual in a licensing year.*

It is the **shipper's responsibility** to ensure that they have met both the exporting and importing requirements. Failure to do so may result in the seizure of an item at the border.

Pelts and Parts

To export any furbearing animal pelt or any other part **out of Yukon**, you must obtain a wildlife export permit from a Conservation Officer. Provide the trapping licence under which it was harvested and any fur sealing tag number(s) for the permit.

To export the pelt, part or product of a wolf, otter or lynx **out of Canada**, you must have a wildlife export permit and a Convention on International Trade in Endangered Species (CITES) permit. CITES permits are issued free of charge at Environment offices, but 24-hour advance notice is required. See www.ec.gc.ca/cites for more information.

All CITES permitted shipments **must be inspected** by the Canada Border Services Agency (CBSA) at the point of exit, and the accompanying CITES permit must be validated at that time. CBSA Whitehorse may validate CITES permits if the goods are exiting Canada directly by mail or air. CITES permits for goods exiting by highway, including hand-carried personal luggage or shipments by commercial truck, must be validated by the CBSA highway port of exit.

The CBSA can advise whether other export documentation is required for shipments. Stop by Room 110 of the Elijah Smith Building, 300 Main Street in Whitehorse, or call 1-800-461-9999.

Many countries have additional requirements for importing wildlife pelts, parts or products. For example, if you are taking furbearing animal pelts or products of beaver, coyote, marten, lynx, otter, muskrat, weasel/ermine, wolf, or fisher into a European Union country, you will need to provide a Certificate of Origin, available at Environment offices.

Manufactured Products

A manufactured product, lawfully obtained by someone for their personal use, may be taken out of Yukon without a permit unless the product is made from a CITES listed species, in which case a CITES permit is required.

A manufactured product is a completed, final product made from wildlife or a part derived from wildlife,

Exporting

which has been legally taken and undergone an entire shaping, manufacturing, tanning, taxidermy, milling, or weaving process that has changed it into an article of commerce according to functional or aesthetic criteria.

Meat and any other part of any wildlife which is only partially processed is not considered a "manufactured product."

Non-commercial exports and imports have certain CITES permit exemptions for tourist souvenirs, personal effects and household effects. Please contact a Federal Wildlife Officer with Environment and Climate Change Canada at 867-393-6876 or 1-888-569-5656 for more information.

Wilderness Tourism Licensing Act

If you take others into the Yukon wilderness for any activity in return for any kind of fee or reward, you must have a wilderness tourism licence. If you rent equipment to others for the purpose of accessing the Yukon wilderness, you may have reporting requirements under the *Yukon Wilderness Tourism Licensing Act*.

For more information about becoming a licensed wilderness tourism operator, call the Department of Environment Parks Branch at 1-800-661-0408, ext. 5648 or visit www.env.gov.yk.ca/camping-parks/tourism_operators.

Guided Trapping

A guided trapping permit allows interested individuals to trap for up to two weeks under the **direct supervision of a trapping concession holder**. The guided trapping permit fee is \$10.

Guided Trapping Permit Requirements

If you want to offer guided trapping excursions on your trapping concession, you must be licensed as both a trapper and a wilderness tourism operator and have the necessary first aid training and insurance in place.

A guided trapping permit may be obtained at an Environment office. You will need to present your trapping licence, wilderness tourism operator licence and first aid certificate. Your permit will only become valid once it is signed by the client you intend to guide. You may supervise a maximum of two clients at any one time.

Assistant trappers cannot hold a guided trapping permit or supervise clients.

Any fur harvested under a guided trapping permit is the property of the concession holder. All trapping activity must be in accordance with the *Wildlife Act* and its regulations.

Furbearing Animal Diseases

Wild animals can host micro-organisms that cause disease, such as bacteria, viruses, or parasites. Some of these organisms can cause disease in humans by spreading from animals to people or by being in the environment (e.g., water or soil).

Trappers should be familiar with the signs and symptoms of these diseases: rabies, hantavirus, mange, tularemia and hydatid disease.

Pets are also highly susceptible to some diseases spread by wildlife.

Help Monitor Wildlife Health

If you find a carcass with internal cysts, white spots on internal organs, enlarged organs, other abnormalities, or no obvious cause of death, please bring it in to the nearest Environment office for examination. **Do not skin or eat the carcass of an animal with an unknown cause of death.** Handle any possibly diseased carcass with caution: wear rubber gloves and carefully seal it in a strong plastic bag for submission. If it will be longer than 24 hours before you can submit the carcass, it is best to freeze it. The results will be shared with you after examination of the sample or necropsy of the carcass is completed. If you are unable to bring in the carcass, take photos of the abnormality from multiple angles and submit them to an Environment office.

Protect Yourself from Disease While Trapping

- ▶ Wear rubber or latex gloves when handling or skinning animals, or handling traps. Wash your hands thoroughly with soap and hot water after you finish handling carcasses and before eating or smoking.
- ▶ Protect your eyes, nose and mouth from contact with any animal's blood or body fluids and thoroughly wash any skin that is exposed to these materials.

Furbearing Animal Diseases

- ▶ Avoid inhaling dust or dander from or around a carcass because it might contain bacteria or parasite eggs.
- ▶ Only drink or use untreated water from streams or lakes after boiling it for at least five minutes. Water can be contaminated by disease-causing micro-organisms, which are destroyed by boiling.
- ▶ Disinfect skinning tools and equipment with a 10 per cent solution of bleach. Apply with a spray bottle to keep down dust and contaminated particles, then wipe down your equipment and work space.
- ▶ If rodents have been active in your cabin, spray droppings or urine with a 10 per cent bleach solution before wiping them up. Do not create dust by sweeping up dried mouse droppings because you could be exposed to hantavirus, which is spread in mouse droppings and urine. Please refer to the *Hantavirus: Protecting Yourself and Your Family* pamphlet available at any Environment office or online at www.env.gov.yk.ca/brochures, or refer to Department of Health and Social Services hantavirus information at www.hss.gov.yk.ca/hantavirus.php.
- ▶ For extra protection when cleaning or handling contaminated material, wear a face mask with an air filter (HEPA).
- ▶ Rodent-proof your cabins. Keep food in rodent-proof containers, clean up food scraps and use mousetraps. Use steel wool to block entry points.
- ▶ Inform your health care provider of your trapping activity if you have symptoms such as fever, swollen glands or a rash.

For more information on wildlife diseases and parasites, refer to Chapter 8 in the *Yukon Trapper's Manual*, read *Diseases You Can Get from Wildlife* at www.env.gov.yk.ca/animals-habitat/animals-and-public-health or contact the departments of Environment or Health and Social Services.

Found carcasses

If you find a wild carcass and want to keep any part of it, you must first bring it to a Conservation Officer and apply for a permit to possess it. The officer will ask a few questions and, if everything is in order, a permit will likely be issued. You can keep naturally shed antlers with the burr intact without a permit.

Harvest Monitoring

The Department of Environment keeps track of the fur harvest annually by monitoring trapping licences, export permits, fur dealer and taxidermist records, and pelt seals.

Never sell or ship fur under someone else's licence or your harvest will appear on their record. It is important to properly document your trapline activity because harvest information is a part of trapline utilization reviews during registration renewals and is also used for compensation claims if your trapping is affected by another land-use activity. If your trapline is not being used, your local Renewable Resources Council may consider it underutilized.

Individual harvest information is confidential and not released without written permission. However, certain government departments have legal authority to obtain this information.

! Offal for bait

Some diseases can affect both wildlife and domestic animals. The transmission of disease between livestock and free-ranging wildlife can have disastrous effects on both.

Using offal from livestock butchering operations (e.g., goats, sheep, pigs, cattle, elk, etc.) as bait piles for trapping or hunting could spread disease to wildlife. If you choose to use livestock offal for bait, please confirm that the source animals were healthy before slaughter.

The Department of Environment does not encourage the use of bait made from offal or carcasses from animals that were put down due to poor health, suspected of having a disease, or died of unknown causes. The department also asks that you not bring offal from wild animals from other provinces or territories into Yukon.

It is now illegal to import whole cervid carcasses or portions of carcasses (such as deer, moose, elk, and caribou) into Yukon. The exceptions to this rule are cleaned skull caps with antlers, cleaned teeth removed from the head, edible meat completely detached from head and backbone, finished taxidermy mounts, and tanned hides.

For additional information about animal and wildlife diseases, please see the current *Yukon Hunting Regulations Summary* or contact the Animal Health Unit at 1-800-661-0408, ext. 5600.

Development Projects in Trapping Concessions

The *Yukon Environmental and Socio-economic Assessment Act* outlines the assessment process for most development projects. Yukon Environmental and Socio-economic Assessment Board (YESAB) rules allow 14 calendar days for notification and comments on projects that have a low potential for significant impacts.

As a concession holder, you are strongly advised to protect your interests by registering directly with the nearest YESAB designated office in order to be notified promptly of projects in your trapping concession area. You can send your comments on projects directly to the local YESAB office.

To check on projects and activities in your area, or to register online, go to **www.yesabregistry.ca**.

For further information on project assessments and the role the Department of Environment plays, please contact the department's Environmental Affairs unit at 1-800-661-0408, ext. 5683.

Protect Yukon Wildlife

Turn in Poachers and Polluters (TIPP) Line

1-800-661-0525

www.env.gov.yk.ca/TIPP

**24 hour
Anonymous
Rewards Available**

How you can help

If you see or suspect someone is violating hunting or fishing laws, or dumping waste in the bush, don't confront them and risk an unpleasant reaction. That's a job for Conservation Officers.

Watch carefully and record the facts:

- ▶ date, time and location
- ▶ number of people involved
- ▶ description of the people
- ▶ description of the vehicle and licence plate number
- ▶ details of the violation or activity

As soon as you can, call the TIPP Line at 1-800-661-0525 or visit **www.env.gov.yk.ca/tipp** to report the details of the offence. You'll help protect the land and wildlife we value so highly, and you may be eligible for a cash reward.
